

THE WORLD OVER

FARRAR COMMITTED FOR TRIAL

OLDS—Albert Farrar, 30 years, was committed for trial in a higher court Monday afternoon following the charges of murdering his father, Fred Farrar, 57-year-old farmer, during a quarrel at the family residence 15 miles east of here, July 28.

SICKNESS STRIKES WATERFOWL

WINNIPEG—A strange sickness is spreading through the waterfowl population of Netley marshes at the mouth of the Red River and Lake Winnipeg, Aaron Gray, sportsman and conservationist of Winnipeg, stated recently. Mr. Gray stated hundreds of ducks and other marsh birds have perished and many are affected to the extent they are unable to escape when humans approach them.

BAR TRAILERS FROM STREETS

Automobile trailers are prohibited from parking overnight on any public street in Alberta under regulations dealing with the vehicles announced by order-in-council published recently in the Alberta Gazette. Overnight parking on public streets of any city, town, village or hamlet is forbidden by the regulations. Visitors wishing to park their trailers in the province on land belonging to some other person and to use the trailer as a temporary residence for a period not exceeding 48 hours may do so if the land owner obtains permission from the "local" board of health.

ELECTION IN ONTARIO ON OCT. 6

TORONTO—After a three-hour council with his cabinet at Queen's Park, Premier Mitchell Hepburn announced Monday night that a general election would be held in Ontario on Wednesday, October 6. Official nomination day will fall on Wednesday, September 29.

As announced by Premier Hepburn in recent speeches, the Liberals seek a new mandate on a platform with three major planks: Opposition to the Lewis Committee for Industrial Organization in the Ontario Labor scene; Its cancellation of hydro power contracts with four Quebec companies; and continued investigation into alleged frauds practiced on the succession duty branch of the Ontario Treasury.

NORTHERN ALBERTANS MAY SHOOT GHOUSE

For the first time in years an open season for ruffed grouse or partridge in the north and northwestern Alberta, from October 1 to 15 inclusive, is authorized under new game regulations for the current season. There will be a closed season throughout the province for prairie chickens.

CARBON WINS FROM THREE HILLS CLUB IN TENNIS MATCH

All Six Events Won by Players of Carbon Lawn Tennis Club

A team from the Three Hills Lawn Tennis Club visited Carbon on August 22nd and played a match with the Carbon Lawn Tennis Club. The events were four Men's Singles and two Men's Doubles, and resulted in a win for Carbon by six events to nil.

The following are the results and scores:

Men's Singles—N. E. Nash, Carbon, defeated M. Hollonquist, Three Hills, 6-5, 6-1. A. Birch, Carbon, defeated K. Wright, Three Hills, 4-6, 6-0, 11-9. F. Poxon, Carbon, defeated H. McKinley, Three Hills, 6-0, 6-1. C. Poxon, Carbon, defeated R. Parker, Three Hills, 6-3, 6-4.

Men's Doubles—N. E. Nash and A. Birch, Carbon, defeated M. Hollonquist and K. Wright, Three Hills, 6-2, 6-1.

C. Poxon and F. Poxon, Carbon, defeated H. McKinley and R. Parker, Three Hills, 6-2, 6-1.

LOCAL NEWS ITEMS

Mrs. Myrtle Oliphant returned to Carbon Sunday from Hinton, Alberta, where she has spent the past couple of months.

Mr. and Mrs. Casper of Edmonton arrived last Wednesday and are visiting at the home of Mr. and Mrs. M. McNaughton.

Mr. and Mrs. Percy Edwards and Mr. and Mrs. L.G. McQuade motored to Banff on Tuesday.

STEADY PROGRESS ON ALBERTA ROAD BUILDING PROGRAM

Alberta is making steady progress on its road program for the current season, involving 500 miles of improvements of various kinds, according to official figures supplied by Hon. W. A. Fallow, Minister of Public Works.

To date the program undertaken comprises 412 miles of graveling, 100 miles of grading and 47 miles of "blotter" surfacing.

"Blotter" surfacing has been so well advanced that many of the projects have been completed by the middle of August.

For the first time in years an open season for ruffed grouse or partridge in the north and northwestern Alberta, from October 1 to 15 inclusive, is authorized under new game regulations for the current season. There will be a closed season throughout the province for prairie chickens.

LAST OF WEDNESDAY HALF-HOLIDAYS

Wednesday, August 25th marked the end of the regular Wednesday half-holidays in Carbon for the summer months, and from now on the business places in the town will remain open on the mid-week day until 6:00 p.m.

DATES AND BAG LIMITS FOR BIG GAME HAVE BEEN ANNOUNCED

Following the announcement of the migratory birds season last week comes the dates and bag limits for big game in Alberta, which are outlined below:

Mountain sheep and mountain goat, September 1 to October 30, inclusive. Deer, moose and caribou, between November 1 and December 14, inclusive.

Bear between September 1 and June 14. The holder of a special elk license may kill one male elk with head of eight points or over in the Pembina-Brazeau elk reserve within the October 1 and December 14, inclusive. It is provided, however, that elk may be taken at that part of the Pembina-Brazeau elk reserve lying within the Brazeau forest between September 15 and December 14, inclusive.

Regulation dealing with bag limits for big game provide the following: one male mountain sheep, two mountain goats, one male deer, one male moose, one male caribou, one male elk with head of eight points or over, one bear of each species, provided that in certain areas bears may be taken without further license or authority other than this regulation.

ARTISIAN WELL SPOITS WATER BARREL A MINUTE

Producing a three-inch stream of cold, crystal clear water at the rate of over two thousand gallons per hour, an artisan well has been produced on the farm of Gregory Bros., eight miles east of Irricana, following the drilling for water to a depth of 100 feet. This flow averages about a barrel per minute, and the fountain-like action of the stream of water is such that it is difficult to order extra tanks for the drinking. Estimates of yield runs as high as 45 bushels per acre.

FERTILIZED PASTURES RESIST THE DROUGHT

"Fertilized pastures are still good, with unfertilized ones becoming poor" states a July crop report issued by the Quebec Provincial Bureau of Statistics. The statement concerns food for thought, as the matter concerns food for the grazing animal and the means of increased profit for the farmer. For years the Department of Agriculture in Quebec has been urging the important advantages of fertilizing pastures, and its representatives in every country have organized and supervised demonstrations of the practice. The periodically published reports of many trials contain striking proofs of its economy, and many a farmer who formerly had been slow to allow three acres of grazing land per cow finds that one of fertilized herbage suffices.

Pastures treated with a fertilizer high in phosphorus are more abundant, more palatable, more nutritious, being richer in protein and minerals. Besides they are ready for grazing earlier in the spring and can be grazed later in the fall. Deeper, stronger rooting of the grasses is promoted by the high phosphorus fertilizer; consequently they are more resistant to drought and do not fade away in summer. This explains the statement in the government report and points the moral.

The fall fertilizing of pasture is now recommended, and the effect is an application of an 0-16-6, applied at the rate of from 400 to 600 pounds per acre, in late August or September or even as late as October, will be manifest in early spring.

DEAD NEWS

Teddy Wacker of Swallow is visiting this week with David Flaws.

Mrs. Dean Twiss is back from a two weeks' holiday at Pine Lake.

Harold and Bill Edwards spent the week end at their home in Carbon.

Mr. and Mrs. W.H. Williamson left on Thursday for the Coast where they will spend a couple of weeks' holiday.

Carl Moorhouse has purchased a new International truck for use in his cattle business.

W. Leitch and son, Kenny, had the misfortune last Saturday morning to spot a load of feed on the hill coming into town from the north east. The rack, horses and all went over the bank into the pasture of Mr. Leitch, and considerable difficulty was experienced in extracting the horses from the quagmire. Fortunately no one was seriously injured.

LONG YEARS AGO

August 30, 1923

Under the name of the Peorles Carbon Collieries, the Stopp mine is being re-opened, and preparations made for production on a big scale. When the new works are completed and all the machinery installed, the mine will be one of the most modern and best equipped in the province. It is on a par with the Gilson Syndicate mine, the largest in the Drumheller Valley.

Miss Alexander of Munson has taken on a position as clerk in Morrison's Drug Store.

Several Carbon people attended John Clayton's barn dance last Friday.

Wheat cutting is in full swing this week and excellent harvest weather prevails. Most of the crops are heavier than at first estimated, and farmers are obliged to order extra trucks for the binding. Estimates of yield runs as high as 45 bushels per acre.

HARVESTING OPERATIONS

Rain the past week has hindered cutting and harvesting operations in the Carbon district, but the season is early this year and it is not anticipated that there will be much difficulty in completing the harvest before the snow flies.

Reports from the hilled areas are to the effect that in most cases the farmers will get their seed back, although on some fields the loss was 100 per cent with no chance of saving a bushel of grain.

SIX-MONTH MORATORIUM ON DEBTS PASSED BY THE PROVINCIAL GOVERNMENT

Premier William Aberhart announced last Saturday that a moratorium would be brought into effect for a six months' period, and on Tuesday the bill was signed by the Lieutenant-Governor.

Purpose of the postponement of debts through this moratorium is to prevent the flight of capital from this province as a result of banks and insurance companies collecting on debts and sending the money outside the province. Thus the government hopes to keep what money there is in the province while the institutions are loath to loan money here.

The moratorium will apply to all debts owing to corporations, although the West-Canadian mine, held at Perry Wharf, was on Sunday, August 22nd. Races, football games, tag-wars, etc. were enjoyed and reformed were served. Everyone attending report an enjoyable time.

8rd Wright and Corrie Frison, who took the Taylor family to their new home at Tomahawk, Alta., returned to Carbon last Wednesday. They brought back Leon Embury, who has been visiting in Edmonton with Mr. and Mrs. Aaron Lacombe.

WEEKLY COMMENT ON THE WORLD OF WHEAT

BY H. C. L. STRANGE

More "Purchasing power." That's what is needed!

On all sides we hear of this need today. Discussion about it rages all the way from dimmed details to acrimonious diatribe.

It is quite apparent, however, that much of the argument is wasted energy. The farmer who has no money and no credit has no purchasing power and no money to buy. The farmer who has no money to buy has no purchasing power.

For instance, farmers who may have a thousand dollars (that sometimes consider they have the same purchasing power) as a farmer who has a hundred dollars in 1915. What they have is the same "purchasing power" as the "purchasing power" is less, because a thousand dollars today will only purchase about 71 per cent of the goods it would purchase in 1915.

A German miller with a million marks has the same "purchasing power" as he had in 1913, but his "purchasing power" in German marks would not be more than about 75 per cent as compared with 1915, and his "purchasing power" in Canadian dollars would be nothing at all unless his marks are exchanged for Canadian dollars, which is only possible when the German marks can sell their own money abroad.

So, when the one exception "purchasing power" has three entire distinct meanings.

Nothing is as foolish as a fed ad in a humble seat unless it is the one with her.

WILL TEACH A FULL COMMERCIAL COURSE IN CARBON SCHOOL

School to Re-Open Here on Wednesday, September 1

Mr. T. H. Ritchie, principal of the Carbon school, who recently returned from taking a five-week's special course at the Calgary Technical school in Grade 10 optional subjects, has informed The Chronicle that this year he will teach a full commercial and bookkeeping course. The commercial course will be taught, the course comprising the same work as that taken up in business colleges.

It is considered that a course of the above nature will be much more beneficial to the average student than that followed in former years, and Mr. Ritchie will be better prepared to teach the course after his intensive study this summer.

Carbon School Teachers

The following teachers have been engaged for the Carbon school this coming term:

Principal, T. H. Ritchie, Room III, J. M. Macdonald, Room II, H. B. Ramsay, Room I, Miss Alice Lacombe.

There were 123 people present at the West-Canadian mine, held at Perry Wharf, was on Sunday, August 22nd. Races, football games, tag-wars, etc. were enjoyed and reformed were served. Everyone attending report an enjoyable time.

8rd Wright and Corrie Frison, who took the Taylor family to their new home at Tomahawk, Alta., returned to Carbon last Wednesday. They brought back Leon Embury, who has been visiting in Edmonton with Mr. and Mrs. Aaron Lacombe.

ODE TO A HORSE

Oh, horse, you are a wondrous thing. No horse to think, no bells to ring. No harness, every year, with plates to stick in front and rear. No spark to miss, no gears to strip; you start yourself, no clutch to slip. No gas bills climbing up each day; the joy of life is yours to play. Your inner tubes are all okay, and thank the Lord they stay that way. Your spark plugs never miss a beat; your motor never makes a fuss. Your frame is iron, and your body never changes size. No need one juggling in your rear, selling summons in your ear. Your wants are few and easy met; you've something on the auto yet.

BOY SCOUT NEWS NOTES

BY THE S. M.

It was with great regret that I bade
farewell to Joe and Clifford Taylor
on the night of Monday, August 16th,
when they left to go to Tomahawk.They have both proved themselves
excellent members of the Troop, and
I am very glad to have been able to
call them Brother Scouts.Those cherry grins they mostly won't
be missed at our meetings. Joe was
very near obtaining his Second
Class Badge, and given another month
would undoubtedly have won it. Clif-
ford wasn't far behind either.Good luck to them. In their new
home, and may they always remem-
ber that they have friends in Carbon.

until he comes out of it.

Psychologists make two general dis-
tinctions, *eg.* micro-maniac and micro-
depressive. In the conversation of the
first type there is a continuous flow
of conversation, superlatives abound
with explosive force and they are very
erratic in their course. Miss J. or X
is a person of high powered energy,
she flies in and talk from one thing
to another. There is little logic or
direction to all her fuss and fery for
she has low-powered central con-
trol. The characteristic qualities of her
type of mental suffering are: (1) an
abundance of energy; (2) high excit-
ability; (3) an abnormal tendency to
be distracted which results in a men-
tal and emotional capriciousness. In
a normal conversation she cannot keep
to the point under consideration but
runs booming and fluttering every-
where. Dr. Overstreet says that this
disease is rooted in physical mal-
adjustment or in unfortunate mental
habits. Both conditions can be cor-
rected but it will take time.The microdepressive is easier to
recognize for when he is depressed he
retreats into an abnormality of mood.
We say that so and so is in a "black"
mood. The point is this: What "so"
and "so" is in the mood he knows he
ought not to be in it, but he is power-
less to do anything about it. Such
sufferers have a dread of the mood
coming on. What first began as a re-
treat becomes an ugly and depressing
castivity. The depressed person sim-
ply cannot get away from himself. He
must find a way of dispersing this
concentration. He must, this is normal
Christian teaching, get away from
himself into larger interests, more
generous and happy living. In other
words he must accept some "One" or
some "Ideal" larger than himself.In the beginning mood exag-
gerations are decorative but always they
are exceedingly wasteful. Don't put
when life goes hard. Snap out of it
while you can.
